

Call for workshop participation:

Governing and Building the Adaptive Capacity - Policies and Actions for Resilient Cities in Sub-Saharan Africa

3rd Research meets Practice Workshop

26th – 27th September 2019

Venue: Rudolf-Chaudoire-Pavillon, South Campus, TU Dortmund University

Since 2017 TU Dortmund and Ardhi University in Dar es Salaam, Tanzania are undertaking a collaborative research on Governance and Planning of Resilient Cities in East Africa - **GOPLAREA**. The aims are to increase the capacity of planning education and explore innovative practices in planning and governance in East Africa. As part of this research collaboration, Institute of Spatial Planning (**IRPUD**) at TU Dortmund University, is hosting the third 'Research meets Practice Workshop'.

The themes of this two days workshop are:

1. Building and developing urban database system for flood risks management (multi-system indicators) which will support controlling and monitoring flood risks and developing response.
2. Participatory and multi-governance approach for urban resilience: this includes mainstreaming the concept of resilience in the local and grassroots governance system; designing a framework to capture and integrate local know-how and experience in planning and plan implementation; mobilizing resources embedded in household and community initiatives and actions to deal with risks to build the capacity of land governance and risk management.
3. Policy actions oriented toward the development of urban database system for risk management and supporting multi-governance approach in building urban resilience.

GOPLAREA, TU Dortmund University, Dortmund, Germany
Registration until July 30, 2019 - goplaarea@post.tu-dortmund.de
