

M.SC. SPATIAL PLANNING

Application documents

Following documents are required for the application:

- Printout of the completed and submitted online enrollment form „Enrollment in open-admission programs “
- Certificates or transcripts from the previous universities
- Proof of insurance from the statutory health insurance fund or, in case of privately insured persons, a certificate of "exemption from compulsory insurance".
- Explanatory statement to the submitted documents (2000-3000 characters incl. spaces in English)

All documents can be uploaded via the application portal of the TU: <https://www.campus.tu-dortmund.de/> (domestic students) or via Uni Assist (www.uni-assist.de/en) (EU- and non EU-students).

It is not necessary to send the documents by post!

If **no degree certificate** from the previous study program is available yet, a qualified transcript of records containing all examination achievements to date must be enclosed with the application. Applicants may also submit suitable official evidence (e.g. certified overview of grades) instead of a degree certificate, showing that a successful degree is expected to be obtained by the start of the courses in the Master's program in Spatial Planning. These applicants may be admitted on the condition that all necessary evidence is submitted by the start of the courses. Enrollment is only possible after all necessary documents, in particular proof of successful completion of studies, have been submitted.

Also, a proof of sufficient English language is required for international students: TOEFL (550 points paper-based, 213 computer-based, 80 internet-based) or IELTS (minimum of 6,0 points) or MELAB (minimum of 78 points) or a certificate that the bachelor programme has been taught in English language.

It is advisable to attach a curriculum vitae in tabular form, which includes the relevant stages of higher education and practical experience.
